

S MORRIS HEATING LTD

Bringing joy to every home

About Us

S Morris Heating Ltd, a gas engineer company covering the Norwich and the surrounding area operating under the Gas Safe Register (previously CORGI) so his work is guaranteed. No matter what your gas appliance requirement - whether it's servicing, installation or landlord gas safety inspection S Morris Heating Ltd is here to help.

Why choose us?

At S Morris Heating Ltd, we understand that having a new boiler installed in your home can feel like a big decision. That's why we're here to make the process as smooth and stress-free as possible, with a focus on your comfort, your home, and your peace of mind.

When you choose us, you're not just getting a boiler—you're getting friendly, experienced engineers who care about doing the job right. We'll take the time to understand your home's heating needs and help you find the perfect boiler for your space and budget. From start to finish, we'll explain everything clearly, so you know exactly what to expect.

On the day of installation, we'll treat your home with the care and respect it deserves. Our Gas Safe registered engineers work efficiently and cleanly, ensuring your new boiler is installed to the highest standard. Once everything is up and running, we'll take the time to walk you through how it works, answer any questions, and make sure you're completely comfortable with your new system.

We also know that energy efficiency matters. That's why we offer modern, energy-efficient boilers that not only keep your home warm but can also help lower your energy bills. And with our transparent pricing and no hidden costs, you can feel confident knowing exactly what you're paying for.

At S Morris Heating Ltd, we're not just here to install boilers—we're here to make sure your home is warm, comfortable, and ready for whatever the weather brings. If you're thinking about upgrading your heating system, give us a call. We'd love to help you find the perfect solution for your home.

Customer Reviews

Would 100% recommend S Morris heating company, been using Simon for few years now - he replaced my boiler, radiators and annually services the boiler. Great service every time.

Kerry Duff

I wouldn't go anywhere else for a gas / heating engineer. He relocated and installed a new combi boiler for a very reasonable price and did so in virtually a single day! He did a fantastic job, making all the pipes neat and tidy. He's very friendly and well presented. I 100% recommend to anyone and will be back in a year for a service. Thanks Simon!

Brandon Frost

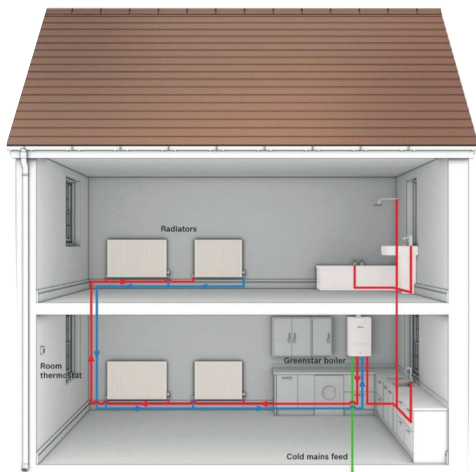

Top-Notch Boiler Repair!

I was recommended Simon for a gas boiler repair, and I couldn't be more impressed. From start to finish, he was punctual, polite, and incredibly professional. He took the time to explain the issue in detail and was very knowledgeable, ensuring I understood the necessary repairs. It's rare to find someone so skilled and trustworthy, and I wouldn't hesitate to recommend Simon to anyone in need of boiler services. I will definitely be calling him again in the future. Thank you, Simon, for your excellent work!

Molly Sutton

A honest reliable tradesman that has serviced my boiler twice now. Last year simon came out and fixed my boiler when it broke down. At first I had another company inform me that my boiler was 'beyond repair' and I required a whole new boiler, which would take four weeks to install. Luckily I went to S Morris heating who came out the same day. Simon discovered my boiler only needed a simple part replacing (which didn't cost the earth) and within the hour my boiler was back up and running. Can't thank him enough.

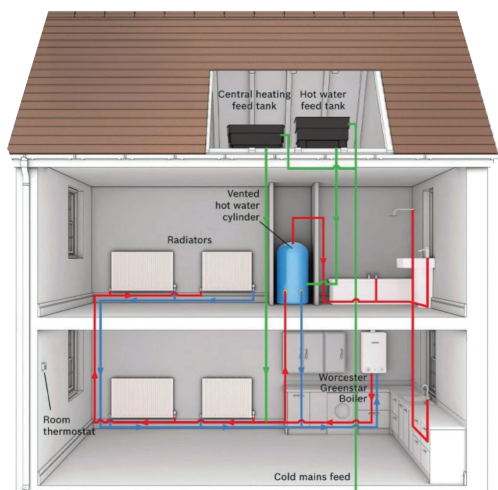

Paddy Mount

COMBINATION SYSTEM DIAGRAM

A COMBINATION (combi) boiler offers several advantages over a conventional boiler. It is compact and saves space since it doesn't require a separate hot water tank. Combi boilers provide instant hot water on demand, making them convenient for busy households. They are also more energy-efficient, which can help lower your utility bills. With fewer parts, they are easier to install and maintain, making them a modern and practical choice for heating and hot water needs.

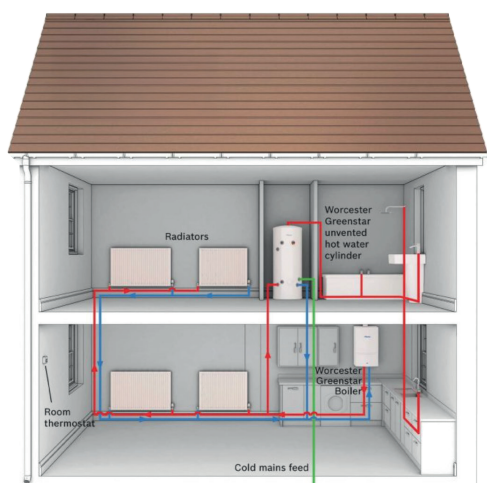

CONVENTIONAL OPEN VENTED SYSTEM DIAGRAM

A CONVENTIONAL OPEN-VENTED SYSTEM is an excellent choice for busy households, providing reliable heating and hot water for larger homes. It ensures that multiple people can shower at the same time without a drop in pressure, making it perfect for family life. With a separate hot water tank, you'll always have hot water available, even during peak usage times.

This system is also compatible with renewable energy sources, enhancing efficiency and sustainability. Choose a conventional open-vented system for dependable comfort that meets the demands of your busy family to install and maintain, making them a modern and practical choice for heating and hot water needs.

CONVENTIONAL SEALED SYSTEM DIAGRAM

A CONVENTIONAL SEALED SYSTEM is a fantastic choice for busy families, offering reliable heating and hot water for larger homes. This system maintains consistent water pressure, ensuring that multiple people can shower at the same time without any issues. With a dedicated hot water tank, you'll always have hot water ready for those peak usage moments. Additionally, sealed systems are designed to be safe and efficient, often requiring less maintenance. Opt for a conventional sealed system to enjoy dependable comfort and meet the demands of your bustling household.

Our Boilers

Ideal Vogue

Premium, reliable, high-efficiency boiler with low NOx emissions built using premium components. Built-in frost protection and full modulation, providing energy savings. Large 3½" colour display, user-friendly controls and easily visible pressure gauge.

- Domestic Hot Water Output: 40kW
- Max. Central Heating Output: 32kW
- Stainless Steel Heat Exchanger
- 12 Year Manufacturer's Guarantee
- Top Flue Outlet

Ideal Logic

Highly efficient boiler with large, full colour display and compact cupboard fit. Supplied with system filter.

- Max. Domestic Hot Water Output: 30.3kW
- Max. Central Heating Output: 25.6kW

- Top Flue Outlet
- Compatible with Solar Panels
- 10 Year Manufacturer's Guarantee

BAXI

Baxi Combi 800

Features LPG conversion for converting between natural gas or LPG without the need for an additional kit. Adey MagnaClean Micro2 filter provides boiler and heating system protection. Includes built-in pipes behind the facility within the boiler casing, brass hydraulics and stainless steel heat exchanger.

- Max. Domestic Hot Water Output: 36kW
- Max. Central Heating Output: 25kW
- Stainless Steel Heat Exchanger
- Top Flue Outlet
- 10 Year Manufacturer's Guarantee

Our Essentials

The MagnaCleanse® system flushing provides an efficient, portable solution for cleansing systems removing system debris in as little as two hours! Even hardened debris is shifted, reducing the need to remove radiators to completely clean the system.

- System flushing can be completed in as little as two hours
- Provides effective, ongoing protection for the system
- Improves the central heating's performance and efficiency
- Extends the life of the system

Magnetic Cleaner

An Ideal System Filter will protect the boiler from the damaging effects of circulating corrosion debris, which has collected in the system as a result of a chemical reaction when water comes into contact with mixed metals used within a heating and cooling system. Note: To prevent further corrosion from taking place, a quality inhibitor should be used in combination with the filter.

Shocker arrester

When a change in water flow is detected, a shock arrestor temporarily closes a valve to allow the pressure to equalize without creating a shock wave. Shock arrestors often contain a flexible rubber diaphragm that acts as a cushion to absorb the shock.

Limescale Reducer

The harder the water, the more minerals it contains and the more likely limescale will be a problem. The Adey Electro Scale has been designed for properties where the water hardness is above 200ppm. It protects the central heating from limescale build up, keeping it working efficiently.

Our Smart Homes

ideal

Recommended

Ideal Halo Combi Room Thermostat

- Fast And Simple To Install – No Wiring, Simply Plug, Pair And Play
- Geolocation For Lifestyle Based Heating, Only Heat Your Home When It Is Occupied
- Smart Support Automatically Sends Boiler Data To Ideal Boilers Customer Services
